Subject: Re: Lumber Estimate

Hi [REDACTED]

I have completed the onsite timber cruise of the Marysville property at 88th and State and have finished totaling the numbers, as follows.

All the trees on the level above the slope, leading to the creek, are included in the cruise totals. All the trees on the slope are not included, presuming the trees on the slope will be left as a buffer and in a critical slope area.

68,400 board feet of Douglas Fir at an average price of \$700 per thousand board feet (MBF) equals \$47,880.

49,400 board feet of Western Red Cedar at an average price of \$1,000 per MBF equals \$49,400.

2,000 board feet of Maple and Cherry at an average price of \$250 per MBF equals \$500.

1,400 board feet of Hemlock at an average price of \$600 per MBF equals \$840.

1,000 board feet of Cottonwood at an average price of \$240 per MBF equals \$240

Sub totals

\$47,880.00 Douglas Fir

\$49,400.00 Cedar

\$500.00 Maple / Cherry

\$840.00 Hemlock

\$240 Cottonwood

Total all species

\$98,860.00
